

SUJAN KAMBLE

Senior UX Designer | Enterprise Product Design | 12+ Years

sujankamble@gmail.com | 9890936926 | [linkedin.com/in/sujankamble](https://www.linkedin.com/in/sujankamble) | Pune, Maharashtra, India | Portfolio: sujankambleux.in

EXECUTIVE SUMMARY

Senior UX Designer with 13+ years delivering enterprise-grade digital solutions across banking, financial services, insurance, and healthcare. Proven ability to translate complex business requirements into scalable, intuitive experiences that drive measurable improvements in usability, operational efficiency, Practitioner of human-centred design from generative research and wireframing through design systems and accessibility (AA) compliant delivery. Adept at leading cross-functional programmes in Agile environments, consulting senior stakeholders, and mentoring design talent consistently recognised for strategic thinking, design capabilities, and high-quality execution in global organisations.

CORE COMPETENCIES

End-to-End UX Strategy & Delivery	User Research & Usability Evaluation	Wireframing & High-Fidelity Prototyping
Design Systems & Pattern Libraries	Interaction & Interface Design	Information Architecture
Accessibility	Journey Mapping & Service Design	Data-Driven & Analytics-Led Design
Human-Centred Design (HCD)	Design Thinking Facilitation	Cross-functional Team Leadership
Agile / Scrum Delivery	Mentoring & Talent Development	

PROFESSIONAL EXPERIENCE

Globant India Pvt. Ltd. | Senior UX Designer

April 2021 – Present | Pune, India

Domains: Banking · Finance Audit · Insurance · Pharmaceutical Manufacturing

- Owned end-to-end UX delivery across 4 concurrent enterprise programmes, discovery, user research (contextual interviews, user goals mapping, usability testing), wireframing, high-fidelity prototyping, and dev-ready handoff across mobile-first B2C and complex platforms.
- Built design systems and pattern libraries from scratch and extended existing client systems; established token architecture, component governance, and accessibility annotations across 4+ product lines.
- Embedded WCAG 2.1 AA standards across almost all projects at the component and workflow levels
- Collaborated cross-functionally with Product and Engineering in Agile sprint ceremonies to define design strategy, shape quarterly roadmap priorities, and validate interaction flows with stakeholders.
- Delivered measurable outcomes: 30% reduction in auditor task-completion time (Finance Audit); no-code configurator enabling independent setup across 4+ insurance products without developer dependency.
- Mentored junior and intern designers; led hiring panels to strengthen team capability.
- Handling 'DOJO' activities for the design studio

Infosys Limited | Senior Consultant – UX Design

Jan 2020 – Feb 2021 | Pune, India

- Consulted on UX strategy across concurrent enterprise banking and retail client engagements, leading discovery phases that translated ambiguous briefs into validated interaction flows informing product roadmaps.
- Planned and facilitated generative user research sessions contextual interviews, Jobs-to-be-Done mapping, and stakeholder synthesising findings into actionable design decisions and prioritisation frameworks.
- Developed design estimation frameworks and proof-of-concept prototypes that improved scoping accuracy by 25%, reducing mid-project requirement churn and enabling more reliable delivery commitments.
- Collaborated with Product and Engineering teams in Agile ceremonies to define interaction models and ensure design feasibility within technical and timeline constraints.

- Delivered end-to-end UX design across 10+ enterprise engagements over 5+ years in banking, finance, and big data producing wireframes, prototypes, navigation models, and UI specifications that reduced design-related rework by 20%.
- Served as the primary design point-of-contact for development teams across multiple projects, maintaining artefacts as the single source of truth and improving upstream clarity through structured handoff processes.
- Planned and facilitated usability testing sessions; findings directly informed task success rate improvements of ~18% and measurable reductions in user error rates across live production releases.
- Applied information architecture and user journey mapping principles to redesign complex data-heavy financial dashboards, improving findability scores in post-launch user evaluations.
- Recognised with 3 internal design excellence awards for research rigour, interaction quality, and cross-functional collaboration on high-visibility enterprise programmes.

Divami Software Pvt. Ltd. | Interaction Designer

Dec 2012 – Feb 2014 | Hyderabad, India

- Designed interaction models and information architecture for enterprise web applications, conducting user research and iterative wireframing in close collaboration with visual designers and front-end engineers.
- Built early-career expertise in user-centred design methodology, usability heuristics, and Agile design workflows — establishing a foundation of rigorous design process carried through subsequent roles.

EDUCATION**Master of Design (M.Des.):** Indian Institute of Technology (IIT) Guwahati

2010 – 2012

Bachelor of Engineering, (Electronics): Shivaji University, Kolhapur**HCI Monsoon Course:** IDC, IIT Bombay, under Prof. Anirudha Joshi (Student Volunteer)**AWARDS & RECOGNITION**

- **Best Designer for Research Projects Award** — Cognizant Technology Solutions
- **Digital Superstar 'DEP Dynamo' Award** — Cognizant Technology Solutions
- **Cognizant Interactive Design Excellence Award** — Cognizant Technology Solutions

TOOLS, TECHNOLOGIES & LANGUAGES**Design & Prototyping:** Figma (primary), Sketch, Adobe XD, Framer, ProtoPie, Adobe Illustrator, Adobe Photoshop, InDesign**Research & Testing:** Dovetail, UserZoom, Maze, Lookback, Hotjar, Optimal Workshop**Collaboration & Facilitation:** Mural, FigJam, Miro, Confluence, JIRA, Notion**Design Systems:** Figma Design Tokens, Storybook (handoff), Material Design, Carbon Design System (familiarity)**Productivity:** Microsoft Office Suite (Word, PowerPoint, Excel, Outlook), Google Workspace**Languages:** English (Professional), Marathi (Native), Hindi (Fluent)
